allowed to work in EU

## INTRO

**Frontend Developer** with a foundation in **Computer Science** and a **passion** for building user-friendly, high-impact web applications.

Recently completed intensive **full-stack** training, gaining expertise in **JavaScript**, **Redux**, **React.js** and **Agile** methodologies (**SCRUM**). Eager to join a **collaborative** team where I can contribute to innovative projects and make a meaningful difference from **day one**.

## PROFESSIONAL EXPERIENCE

Techmongers Amsterdam

2023 Jan- 2024 Feb

Full Stack Developer

### Full Stack Development Bootcamp

- Completed a 10-week immersive bootcamp focused on front-end (**HTML**, **CSS**, **JavaScript**, **React**) and back-end (**Node.js**, **Express**, **PostgreSQL**) development.
  - Built and deployed responsive web applications, integrating **RESTful APIs** and using **Git** and **GitHub** for version control.
  - Applied **Agile** methodologies through **sprint** planning, code reviews, and team collaboration.(**SCRUM**)
  - Created & Completed multiple full-stack projects as per **SCRUM** methodology
- ### Projects
- Babysitter application:** Developed a user-friendly mobile app that allows parents to book babysitters, manage profiles, and review services. Built a **responsive** interface using **RESTful APIs** and implemented **PostgreSQL** database on the backend for managing user data and bookings.
  - Glow Guide:** A web application that allows users to select colors and color harmony options, providing AI-generated recommendations based on user input. Built using **Iro.js** for color selection and **React Toast** for notifications.

### Other Technologies

REACT.js, RESTful APIs, JavaScript, Node.js, Python, SCRUM

## PROFESSIONAL EXPERIENCE

### Personal Projects

2019 Jan – 2022 Dec

Freelancer

#### Web Development Tutoring

- Kept myself active and involved in technology by teaching, helping family members maintain web applications and following online courses
- From concept to completion, I focused on building responsive, user-friendly projects while sharpening my skills in full-stack development.
- Tutoring & Mentoring students on mathematics & programming

### KADAPA, India

2013 Jan – 2015 Feb

Programming Teaching Assistant

- Provided hands-on technical support to students, troubleshooting issues and guiding them through their project work.
- Assisted in teaching IT fundamentals, helping students understand key concepts.
- Collaborated with faculty to create a supportive learning environment, by meeting technical needs and escalating issues.

Between 2014 to 2019, I dedicated my time to my family, during which I developed valuable skills in time management, conflict resolution and multitasking.

In 2023, I refreshed my technical expertise through a 10 week **Bootcamp in Amsterdam with Techmongers.**
